Executive Summary

The pizza restaurant has generated a total revenue of \$817,860.05 from 21,350 orders, with an average order value of \$38.31. The revenue trend shows fluctuations throughout the year, with the highest growth in November 2015 at 9.95% and the biggest decline in December 2015 at -8.09%. Overall, the restaurant's performance indicates a strong presence in the market, but with areas for improvement. The peak month of July 2015 saw a revenue of \$72,557.90.

Revenue & Growth Insights

- The highest growth month was November 2015, with a revenue of \$70,395.35 and a growth percent of 9.95%.
- The biggest decline month was December 2015, with a revenue of \$64,701.15 and a growth percent of -8.09%.
- The total revenue for the year was \$817,860.05, with a cumulative revenue record of 358 entries, starting from \$2,713.85 on January 1, 2015.
- The monthly revenue trend shows fluctuations, with revenues ranging from \$64,180.05 in September 2015 to \$72,557.90 in July 2015.

Product Performance Insights

- The top-selling pizzas are 'The Classic Deluxe Pizza', 'The Barbecue Chicken Pizza', and 'The Hawaiian Pizza', with total quantities of 2,453, 2,432, and 2,422, respectively.
- The best-performing pizza size is 'L', with a revenue of \$375,318.70 and a revenue percentage of 45.89%.
- The worst-selling pizzas are 'The Brie Carre Pizza', 'The Mediterranean Pizza', and 'The Calabrese Pizza', with total quantities of 490, 934, and 937, respectively.
- The 'Classic' category has the highest revenue percentage contribution of 26.91%, followed by 'Supreme' at 25.46%, and 'Chicken' at 23.96%.

Customer Behavior & Timing Insights

- The peak hours for orders are 12 pm, 1 pm, and 6 pm, with order counts of 2,520, 2,455, and 2,399, respectively.
- The average order value is \$38.31, with a slightly higher average order value on weekends at \$38.46 compared to weekdays at \$38.25.
- Weekdays generate more revenue than weekends, with \$595,474.15 in revenue and 15,568 orders, compared to \$222,385.90 in revenue and 5,782 orders on weekends.
- Friday is the day with the highest revenue, at \$136,073.90, followed by Thursday at \$123,528.50, and Saturday at \$123,182.40.

Recommendations

- Increase marketing efforts during the peak hours of 12 pm, 1 pm, and 6 pm to capitalize on high demand, with a focus on promoting the top-selling pizzas.
- Offer promotions or discounts on 'L' sized pizzas to maintain its high revenue percentage contribution of 45.89% and encourage customers to upgrade to larger sizes.
- Develop a strategy to improve sales of worst-selling pizzas, such as 'The Brie Carre Pizza', by rebranding or repositioning them, or considering removal from the menu if sales do not improve.

- Allocate more resources to the 'Classic' category, which contributes 26.91% to the revenue, to further increase its sales and revenue.
- Consider implementing a loyalty program to incentivize customers to place orders on weekdays, which generate more revenue than weekends, with a focus on increasing average order value.

Risks to Watch

- The decline in revenue in December 2015 at -8.09% may indicate a seasonal trend, and the restaurant should prepare for potential slower sales during the winter months.
- The underperformance of certain pizzas, such as 'The Brie Carre Pizza', may indicate a need to reassess the menu offerings and make adjustments to better meet customer preferences.
- The reliance on a few top-selling pizzas and sizes may make the restaurant vulnerable to changes in customer preferences, and the restaurant should consider diversifying its offerings to mitigate this risk.
